Index of Subjects

African horse sickness, transmission and distribution of virus serotypes: in zebra, 43
AIDS, the relationship between beta-2-microglobulin, CD4 lymphocyte count, and death in HIV-positive individuals, 259
Airborne route, a simple device for the exposure of animals to infectious microorganisms by the, 71

Brucella, variations in the prevalence of antibody to, infection in cattle by farm, area and district in Kenya, 35
Burkholderia pseudomallei, characterization of, and *Burkholderia pseudomallei*-like strains, 137

Campylobacter jejuni, genotype analysis of human blood isolates of, in England and Wales, 81
Campylobacter jejuni, the serotype distribution of, and *C. coli* isolated from patients with diarrhoea and controls at Tikur Anbassa Hospital, Addis Ababa, Ethiopia, 91
Capripoxvirus-rinderpest, trial of a, recombinant vaccine in African cattle, 63
C. coli, the serotype of *Campylobacter jejuni* and, isolated from patients with diarrhoea and controls at Tikur Anbassa Hospital, Addis Ababa, Ethiopia, 91
Chlamydia pneumoniae infection in patients with chronic obstructive pulmonary disease, 155
Cholera, epidemic, among refugees in Malawi, Africa: treatment and transmission, 207
Cysticercosis, co-existence of cerebral, with Japanese encephalitis: a prognostic modulator, 165

Escherichia coli, a fifteen month study of, O157:H7 in a dairy herd, 17
Escherichia coli O157, a longitudinal study of, in fourteen cattle herds, 193
Escherichia coli, origin and characteristics of entero-invasive strains of, (EIEC) isolated in Germany, 199

Foot-and-mouth disease virus, dexamethsone inhibits virus production and the secretory IgA response in oesophageal–pharyngeal fluid in cattle persistently infected with, 181

Group B streptococci, isolation and characterization of, from human and bovine sources within and around Nairobi, 215

Helicobacter pylori, PCR-RFLP typing of *ureC* from, isolated in Argentina from gastric biopsies before and after treatment with clarithromycin, 119
Hepatitis A, detection of antibodies against, in blood spots dried on filter paper. Is this a reliable method for epidemiological studies? 189
Hepatitis A, the role of young children in a community-wide outbreak of, 243
HIV, the relationship between beta-2-microglobulin, CD4 lymphocyte count, AIDS and death in, -positive individuals, 259

Influenza, selection of neutralizing antibody escape mutants with type A, virus HA-specific polyclonal antisera: possible significance for antigenic drift, 149
Influenza vaccine, effectiveness of, in reducing hospital admissions duirng the 1989–90 epidemic, 27

Japanese encephalitis, co-existence of cerebral cysticercosis with, a prognostic modulator, 165

Lambs, the relationship between abnormalities detected in live, on farms and those detected at post mortem meat inspection, 267

Meningococcal, non-culture diagnosis and serogroup determination of, B and C infection by a sialyltransferase (*siaD*) PCR ELISA, 111
(MRSA), methicillin-resistant *Staphylococcus aureus*, in nursing homes in a major UK city: an anonymized point prevalence survey, 1
Mycobacterium bovis, the kinetics of serum antibody responses with, in one badger social group, 173
Mycobacterium paratuberculosis, comparative study of, strains isolated from Crohn's disease and Johne's disease using restriction fragment length polymorphism and arbitrarily primed polymerase chain reaction, 227

Rubella, an outbreak of, in British troops in Bosnia, 253

Salmonella enterica, antimicrobial resistance of, Typhimurium DT104 isolates and investigation of strains with transferable apramycin resistance, 97
Sexually transmitted diseases among foreigners in Italy, 235
Streptococcus, characterization of the Lancefield group C, 16S-23S RNA gene intergenic spacer and its potential for identification and sub-specific typing, 125
Streptococcus pneumoniae, epidemiology of invasive, infections in adults in Finland, 7
Streptococcus pneumoniae, genetic relationship of penicillin resistant, serotype 19B strains in Japan, 105
Swine vesicular disease, molecular epidemiology of recent outbreaks of: two genetically and antigenically distinct variants in Europe, 1987–94, 51

Vibrio vulnificus infection reporting on death certificates: the invisible impact of an often fatal infection, 221
